**Insights for in-person
events**

1

Problem 1

Remembering and following up with who I've met at networking events is difficult

2

Problem 2

LinkedIn has made it easy to amass connections but lacks valuable context of the connection and follow up actions

3

Problem 3

Networking events take energy and time and lack connection metrics to know if attending produced any ROI

1

Solution 1

Scan a QR code to simplify check-in with a reusable event profile

2

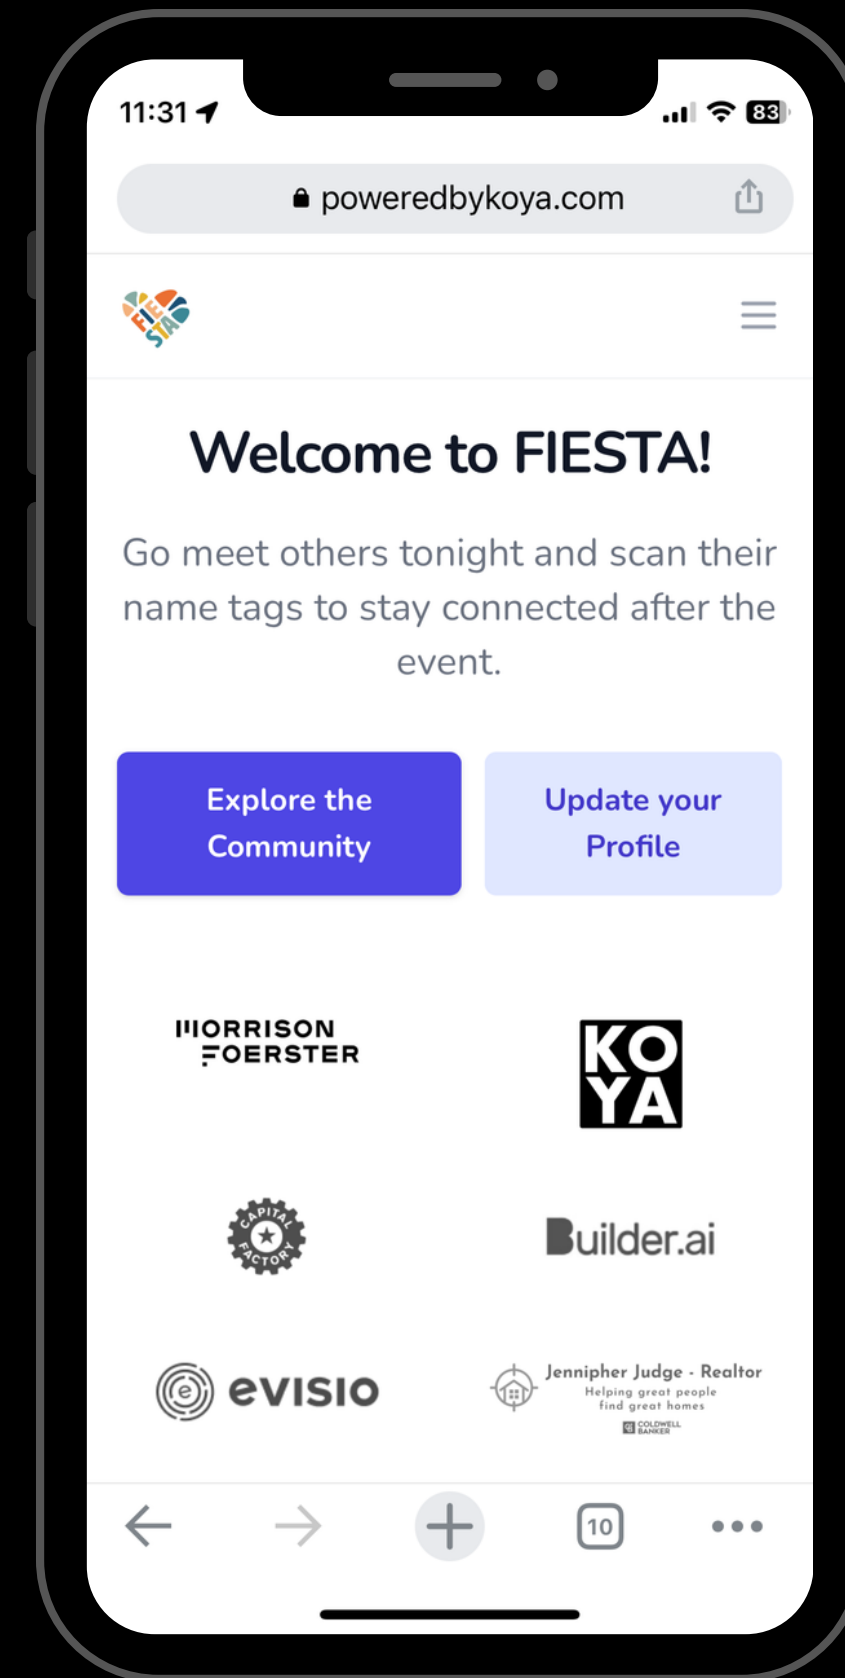

Solution 2

Scan nametag QR codes to quickly create follow-up intentions while staying present in conversation

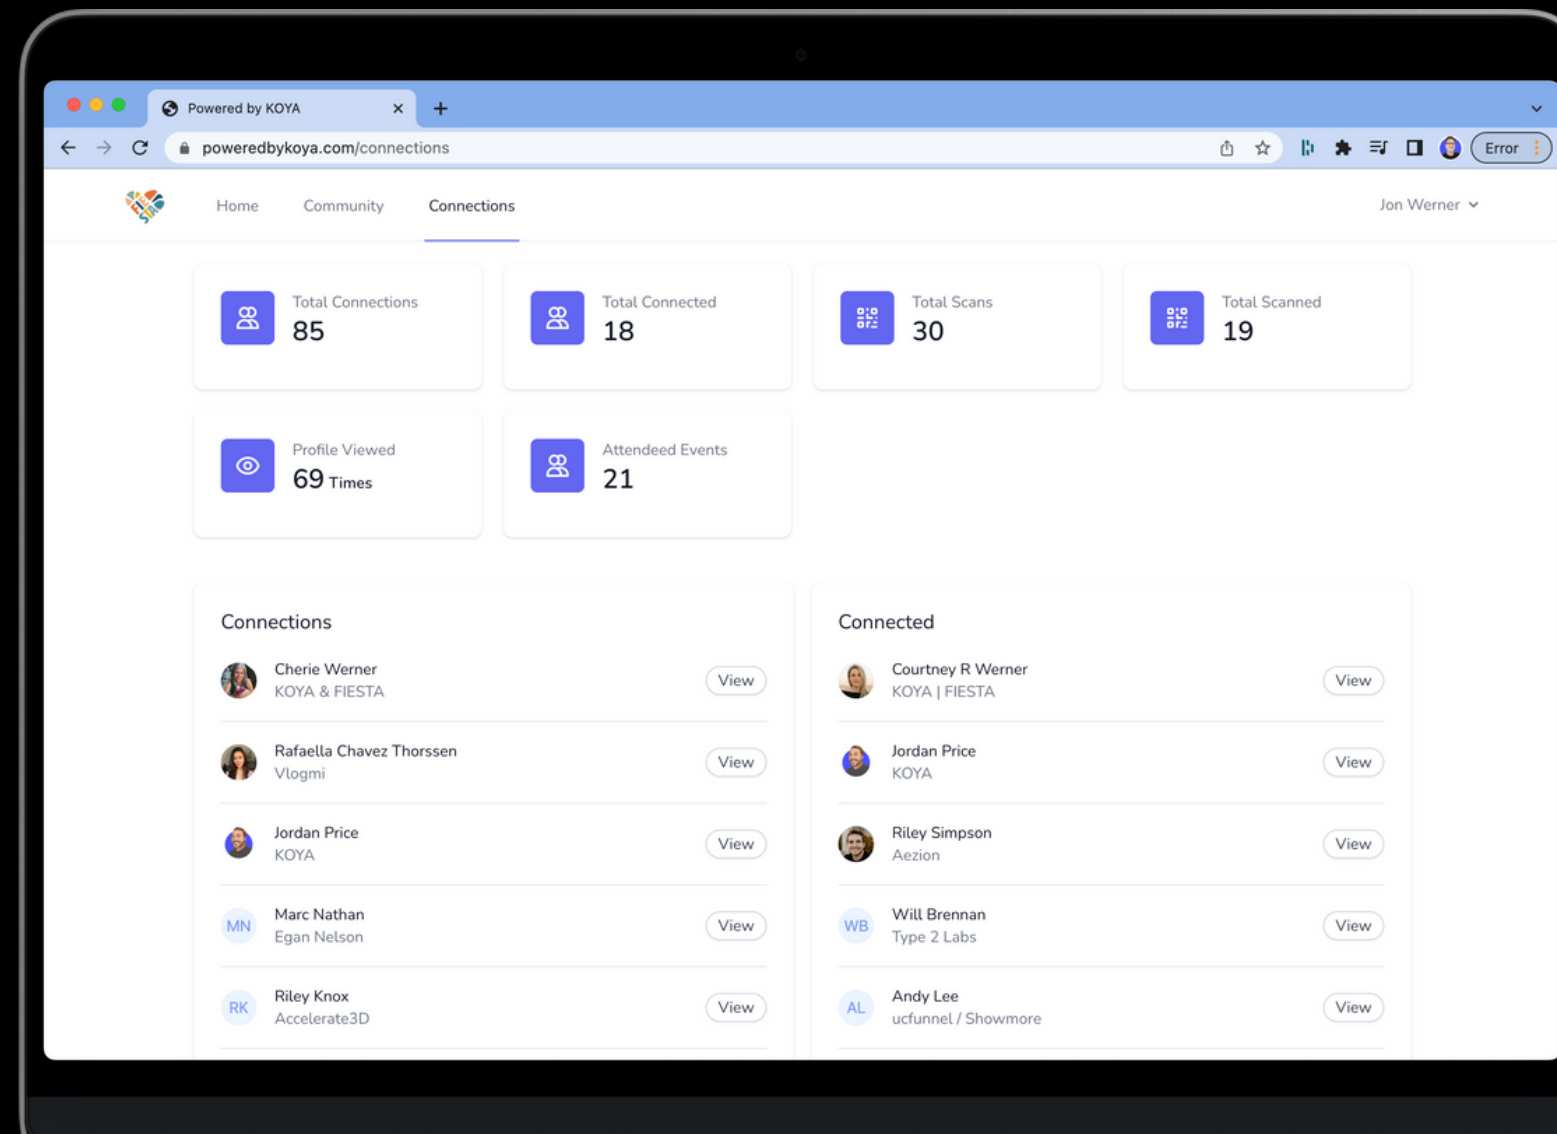

3

Solution 3

Receive a digest of all interactions after each event to then make connection requests and followup actions

Birth of the KOYA connect Service

KOYA connect was established to facilitate face-to-face interactions at FIESTA and to encourage collaboration and mutual support among participants outside of the monthly event. From its first prototype, KOYA connect has facilitated over 27 events and has witnessed a rise in connections and collaboration within Austin's startup ecosystem. As community builders, we use the data we've gathered to form partnerships with aligned sponsors for the betterment of the community.

Jul 2021

First FIESTA event

May 2022

Competitive Advantages

Domain Experts

We are domain experts in running founder networking events

Sponsorship ROI

KOYA connect collects the right data to provide event organizers with aligned sponsors and grants

Context

KOYA connect brings valuable in-person context to help attendees remember where and when connections were made

FoMo

KOYA connect increases event registration and attendance through connection-based notifications

Business Model

Monthly Service Subscription

Tiered pricing based on number of active attendees in community

QR Badge labels

Pricing based on number of activated QR codes

Matchmaking Services

Founder to Investor and Founder to Mentor recommendations

Future Roadmap

Step 1

Q1 2023

Launch at SXSW
with 5+ events

Step 2

Q2 2023

QR Badge labels
Additional
notifications

Step 3

Q3 2023

Self-serve portal
Chat
KOYA messaging

Step 4

Q4 2023
